

# SLITTING LITHIUM-ION BATTERY-, ACCUMULATOR -, SEPARATOR- AND CAPACITOR FOILS

## WITH THE SPECIALIST DIENES FOR GOOD REASON

Slitting battery foil for a wide variety of applications is a demanding process. It is good to know that with slitting tools from DIENES you always perform excellently in terms of quality and economy.

Highest demands are necessary regarding the precision of the cutting edge quality and the service life of the knives.

The avoidance / minimization of metallic knife wear and reduction of slitting dust are further material-typical challenges that DIENES, as a slitting specialist with over 100 years of experience, has to face.

DIENES offers all components for the various slitting processes (circular shear cut, razor blade cut and shear cut): such as suitable knives in different material qualities, special collars as well as adequate bottom knives and knife holders.

Please do not hesitate to contact us for further technical information:
